∞ Meta Quest

Meta XR All-in-One SDK

XR Interaction Toolkit

The XR Interaction Toolkit package is a high-level, component-based, interaction system for creating VR and AR experiences. It provides a framework that makes 3D and UI interactions available from Unity input events. The core of this system is a set of base Interactor and Interactable components, and an Interaction Manager that ties these two types of components together. It also contains components that you can use for locomotion and drawing visuals.

XR Interaction Toolkit contains a set of components that support the following Interaction tasks:

- Cross-platform XR controller input: Meta Quest (Oculus), OpenXR, Windows Mixed Reality, and more.
- Basic object hover, select and grab
- Haptic feedback through XR controllers
- Visual feedback (tint/line rendering) to indicate possible and active interactions
- Basic canvas UI interaction with XR controllers

Main Challenge

Set up your Meta Quest
with the Meta Horizon
mobile app

 Meta Quest

Quest Link

in

Unity

Environment

NPC Prefab

Flare Gun

NPC Spawner

- 20 NPC Prefabs Spawned
- 5 Assigned to be Imposters
- Behaviour Change Based on Speed

Player Control

▼ # ☒ Player Movement (Script) ? ≡ ⋮

Script	# PlayerMovement ⊙
Move Speed	5
Rotate Speed	100
Gravity	-9.81
Jump Height	0.5

Additional Challenge

NavMesh

NPC Script

```
void SetNewDestination()
{
    for (int i = 0; i < 10; i++)
    {
        Vector3 randomPoint = GetRandomPointInNavMeshBounds();
        NavMeshHit hit;
        if (NavMesh.SamplePosition(randomPoint, out hit, 2f, NavMesh.AllAreas))
        {
            NavMeshPath path = new NavMeshPath();
            if (agent.CalculatePath(hit.position, path) && path.status == NavMeshPathSt
            {
                agent.SetDestination(hit.position);
                return;
            }
        }
    }
}

1 reference
Vector3 GetRandomPointInNavMeshBounds()
{
    Bounds bounds = NavMeshBoundsHelper.navMeshBounds;
    float x = Random.Range(bounds.min.x, bounds.max.x);
    float z = Random.Range(bounds.min.z, bounds.max.z);
    float y = bounds.center.y;
    return new Vector3(x, y, z);
}
```

Generate Destination → Move → Idle

Flare Gun Functionality

# ☒ Flare Bullet (Script)	
Script	# FlareBullet
Force	1000
Life Time	5
Good Hit Sound	🎵 happy-trimmed
Sad Hit Sound	🎵 trimmed_evil
Audio Source	None (Audio Source)
Lit (Material)	
Shader	Universal Render Pipeline/Lit

User Feedback

User 1

“It sounds simple and fun, I like that you can command them with your voice, but I’d recommend adding some variation. Nevertheless, the current version keeps it simple and playable by everyone, young and old.”

User 2

*“this is a proper game. I thought you stole it from somebody. The **latency** is the only problem stopping this game from being perfect.”*

THANK YOU!
